

OMNIBALLOT

T A B L E T

Off-the-shelf HAVA compliant ballot marking device used in polling locations for voters with disabilities

FEATURES + BENEFITS:

Easy & Flexible

- Easily integrates with current tabulation systems
- Simple data upload and setup process
- Prints marks directly onto optical scan ballot
- No federal certification required

Accessible

- Gives the 25-30 million Americans with disabilities the ability to mark their ballots independently and privately
- Fully accessible, providing magnification for voters with visual impairments and compatible with other assistive technology, headphones, tactile buttons, and sip-and-puff devices
- Ensures compliance with the federal Help America Vote Act (HAVA) accessibility requirement

Cost Effective

- Up to 50% less expensive than alternative systems
- Easy and affordable to set up, maintain, store and transport
- Hardware can be repurposed for other uses within the jurisdiction

Secure

- Reviewed and approved for ballot marking by SLI, a federally approved independent lab
- Utilizes proven Microsoft Windows operating system
- No wireless required
