

DEMOCRACYLIVE

OMNIBALLOT

T A B L E T

**Certified,
Stand-Alone,
Ballot Marking Device
Used In Polling Locations
For Voters With Disabilities**

THE FIRST **BMD** MODULE THAT PRINTS ANY BALLOT

Allows for Secure Vendor Gap Between Tabulation & BMD

- State can select best tabulation system and best BMD
- Works with any ballot the state will use
- Choice of *Print on Ballot* or *Print Full Ballot*
- EAC-Approved Lab (SLI) Certified

Accessible

- Gives voters living with disabilities the ability to mark their ballots independently and privately
- Fully accessible providing audio and magnification for voters with visual impairments and compatible with other assistive technology, headphones, tactile buttons and sip-and-puff devices.
- Deployed in hundreds of elections for voters with disabilities

**BEST OF BREED-
PICK THE BEST TABULATION
SYSTEM AND THE BEST BMD**

www.democracylive.com

Cost Effective

- Up to 50% less expensive than alternative systems
- Easy and affordable to transport, set up and store.
- Low cost replacement of equipment

Secure

- Reviewed and approved for ballot marking by SLI, a federally approved independent lab
- BMD untethered from tabulation system
- Stand-alone modularity is considered a security best practice
