OMNIBALLOT
BALLOT PORTAL

Ballot Cure

OmniBallot provides a ballot cure form that jurisdictions can use to capture an up-to-date signature from a voter to cure their ballot. Voters can sign using their mouse, a trackpad, or a touchscreen and return it to the election official through the secure portal.

Auto Duplication

OmniBallot allows election officials to duplicate faxed or emailed ballots and print them on to a machine-readable ballot.

Auto-Duplication saves time, money, and eliminates a risk point in the elections process.
